

Trimfast™ A-Frame Vertical Multi Substrate Cutters are revolutionary vertical cutters that offer a high degree of performance & accuracy.

▲ TFMS-210
(shown with optional Free Standing Kit)

NEW FEATURE

All 3 systems can now be extended in width to 275cm/108" with an optional extension arm.

Design and Performance

Affordable

Manufactured in the UK, the Trimfast A-Frame Vertical Multi Substrate Cutters are truly affordable finishing solutions for any sign making business.

Design

The Trimfast A-Frame is designed to cut cleanly and accurately, without dust and without noise. Featuring interchangeable tool cartridges which can be changed in under 10 seconds, you will only need to buy the tools you need. Repeat cuts for production runs are made quick & accurate with the 2 production stops and with the built-in counterbalance, hands are left free for loading material and causing less operator fatigue. The A-Frame also includes end caps on each of the support beams as an added safety feature.

Versatile

The TFMS-TH1 Tool Holder is included as standard and will cut foam board, PVC, corrugated card, polystyrene and any other materials that are commonly cut using a Stanley knife. Optional tool holders are available for cutting aluminium composites, as well as Dibond® & MDF (TFMS-TH2), for 'V' grooving aluminium composites (TFMS-TH3), for scoring acrylics (TFMS-TH4) and scoring glass (TFMS-TH5). The tool holder system means that new tools can be developed for new materials, giving the Trimfast A-Frame Vertical Multi Substrate Cutters virtually unlimited scalability. The A-Frame cutters include 1 years warranty* as standard.

Specifications	TFMS-165	TFMS-210	TFMS-250
Height (cm/inches)	165cm/65"	210cm/83"	250cm/98"
Standard width (cm/inches)	213cm/84"	213cm/84"	213cm/84"
