## Introduction

Thank you for purchasing the Trimfast Safety Straight Edge.

Manufactured in the UK, the Trimfast Safety Straight Edge is a device that safely gives a high quality finish to work.

The straight edge is made from extruded aluminium and anodised, meaning the device has been designed to last and is ideal for any workplace. It has been designed and made uniquely, with its arched shaping, allowing the cutter to be safer to use helping to avoid any tool slippages. It also helps to focus downward pressure securely when cutting.

On the underside of the straight edge, there are two full length silicon inserts to allow easier gripping and protecting sensitive surfaces. The front edge of the device has a full length dual metric/imperial scale and a press-fit stainless steel bead, helping to protect the aluminium edge from blade and cutting damage.

Available in six sizes from 60cm (24") to 300cm (118") this device is essential for cutting, scoring and pen lining.

## Contents

After unpacking the Trimfast Safety straight edge, check to make sure that there is no damage.

## Spare Parts

For Spare Parts please contact your supplier

## Operation

It is important that the Trimfast Safety straight edge is used on a flat surface. A warped or bowed table top can create a twist in the rail resulting in a curved cut or line. Always use a cutting mat when cutting.

The Trimfast Safety straight edge can be used with a wide range of tools.

## General Maintenance

Regularly clean the Trimfast Safety straight edge using a dry cloth, stubborn stains can be removed with a cloth dampened with a little water/detergent.

# Warranty & Incorrect Use

## IMPORTANT INFORMATION

Your Trimfast Finishing System should reach you in perfect condition, however please retain all of the original packaging once you have unpacked your Finishing System in case you need to return it for repair. If your system arrives damaged or faulty in anyway, this must be reported to your supplier immediately. If the Finishing System is sent back for repair under warranty and is damaged in transit due to faulty packaging your warranty may be void.

Your Finishing System is guaranteed for 1 year from date of purchase covering defective parts and general wear and tear; it does not cover any damage to the blades.
